

Bournmoor Primary School

SCHOOL ASTHMA POLICY

It is the responsibility of the Governing Body to ensure that all reasonable and practical steps are taken to safeguard the health and safety of pupils when they are authorised to be on school or other educational premises or where they are engaged in authorised activities elsewhere.

Asthma Education

Schools have a responsibility to advise all its staff on practical asthma management. The school nursing service can be involved to advise and offer support. At Bournmoor Primary School we work in partnership with parents to ensure that children who require asthma support are known to us and we keep their names on our updated Medical List.

Asthma Care Plans

We ensure that asthma care plans are checked and updated by parents so we have the correct pupil information. Inhalers are checked for the expiry date to support pupils in school who require them. Parents are contacted when inhalers are close to expiry date so they can contact their GP.

Parents

The school asks all parents whether their child has asthma and we do this as part of our induction of new pupils, which includes any medical conditions. We keep a register of all asthmatic children and this includes details of the treatment that each child uses and in particular any inhalers which need to be used at school.

Access to Inhalers

Reliever inhalers (usually blue) are of particular importance. It is essential that the child has access to this inhaler at all times. A delay in taking this treatment can lead to a severe attack and in rare cases could be fatal. Relievers commonly used are: Salbutamol, Ventolin, Salamol, Aerolin, Bricanyl, Terbutaline.

Teachers encourage the child to have easy access to their reliever inhaler on school trips, on the sports field and at break and lunchtimes.

As a school we keep spare inhalers for those children prescribed to use them. We follow Guidance on the use of emergency salbutamol inhalers in school, as provided by the Department of Health.

Nebulisers

Children with severe asthma may use an electric compressor called a nebuliser to deliver the asthma drugs. The school nurse or the child's GP liaise with the school to give correct management advice for these children when appropriate and we receive a copy of their Asthma Care Plan.

Sports

Sports teachers should be aware that a number of pupils with asthma take a dose of their reliever inhaler before exercise, and may need to use their inhaler again on the sports field or in the swimming pool. If a child seems over-reliant on their inhaler then this concern should be communicated to the child's parent as this may mean that the child's asthma is poorly controlled.

Trigger Factors

Many things can trigger an asthma attack. This may be because of allergy to eg, pollen or animal hair but just as important are irritants such as cigarette smoke or chemical fumes. Every attempt should be made to ensure that asthmatics are not exposed to cigarette smoke and this is supported by our No Smoking Policy, including the use of Vapes. Care may also be taken if pets are kept in the classroom and we inform parents if we plan to have a pet in e.g. Guide Dogs for the Blind.
